Department of Electrical and Electronics Engineering EE001 LPOWER GENERATION SYSTEMS 3 T P C 0 3 Course Objectives: To understand the working of different types of power generation systems and to realize the necessity for interconnected operation of different power stations.

EE001 LPOWER GENERATION SYSTEMS T P C 0 3

used from this point on in these training modules unless otherwise stated. Voltage is the force that is applied to a conductor to free electrons, which causes electrical current to flow. It is measured in volts or V . Current will flow in a conductor as long as voltage, the electrical pressure, is applied to the conductor.
