A permanent wave, commonly called a perm or "permanent", involves the use of heat and/or chemicals to break and reform the cross-linking bonds of the hair structure. The hair is washed and wrapped on a form and waving lotion or 'reagent' is applied. This solution reacts chemically softening the inner structure of the hair by breaking some of the cross links within and between the protein ...

A. GENERAL CLOSURE TYPES. This section covers closures that were used on a wide array of bottle types, i.e., closures which are generally not identified with only one or two types or classes of bottles. Inherently these closure types saw wide use for many types of bottles - implying higher than usual functionality - and because of that also experienced a long time span of use.
