Construction includes building and civil engineering projects including work by contractors, by ... The objective of the proposed work is to compare the cost of construction such as building materials, ... analyze and compare the rate of construction materials cost,

Study and Rate Analysis of Escalation in Construction industry

Sometimes, the production rate is replaced by the term productivity. In the most general sense, productivity is the ratio of input versus the respective output. In construction, the input is often the work hours of a worker or a crew, such as the 8 hours of a bricklayer. The output is the amount of work produced, such as laying 500 bricks.
