UNESCO - EOLSS SAMPLE CHAPTER FOOD ENGINEERING " Engineering Properties of Foods - Barbosa-Cãnovas G.V., Juliano P. and Peleg M. " Radiation is the transfer of heat by electromagnetic waves (as in a microwave oven). " Conduction is the transfer of thermal energy due to molecular oscillations (for example, heating of food by direct fire through metal containers).

In physiology, an action potential occurs when the membrane potential of a specific axon location rapidly rises and falls: this depolarisation then causes adjacent locations to similarly depolarise. Action potentials occur in several types of animal cells, called excitable cells, which include neurons, muscle cells, endocrine cells, and in some plant cells.

Action potential - Wikipedia

MSC.visualNastran, desktop CAPABILITIES OVERVIEW MSC.SuperForge 2003 is an industrially proven software package for the computer simulation of industrial forging processes.

Moore's law came to be widely accepted as a goal for the industry, and it was cited by competitive semiconductor manufacturers as they strove to increase processing power. Moore viewed his eponymous law as surprising and optimistic: "Moore's law is a violation of Murphy's law. Everything gets better and better."

Moore's law - Wikipedia

Preface. This is the preprint of an invited Deep Learning (DL) overview. One of its goals is to assign credit to those who contributed to the present state of the art. I acknowledge the limitations of attempting to achieve this goal.

As a prototypical photocatalyst, TiO₂ is a material of scientific and technological interest. In photocatalysis and other applications, TiO₂ is often reduced, behaving as an n-type semiconductor with unique physico-chemical properties. In this review, we summarize recent advances in the understanding of the fundamental properties and applications of excess electrons in reduced, undoped TiO₂.
