Analogy plays a significant role in problem solving, as well as decision making, argumentation, perception, generalization, memory, creativity, invention, prediction, emotion, explanation, conceptualization and communication. It lies behind basic tasks such as the identification of places, objects and people, for example, in face perception and facial recognition systems.

### **Analogy - Wikipedia**

The word thought comes from Old English *þoht*, or *geþoht*, from stem of *þencan* "to conceive of in the mind, consider".. The word "thought" may mean: a single product of thinking or a single idea ("My first thought was â€“no.â€™") the product of mental activity ("Mathematics is a large body of thought.")

### **Thought - Wikipedia**

Case study research is the most popular research method for researchers in industrial marketing. However despite a number of attempts the problem of satisfactorily justifying the use of case research remains.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
