The high transfer-to-hydrolysis ratio makes such enzymes ideal for the industrial production of FOS. Pectinex Ultra, an enzyme preparation from *A. aculeatus*, is typically used for the production of FOS from sucrose. However, this commercial enzyme also features  $\beta$ -glucosidase activity and is therefore not suitable for the processing of steviol glycosides.

Enzymatic treatment of biomass is an environmentally friendly method to obtain a range of products, such as biofuels, animal feed or food ingredients. The objective of this PhD study was to produce functional food ingredients – oligosaccharides and polysaccharides by means of enzymatic catalysis from biomass: casein glycomacropeptide (cGMP ...

Enzymatic production of lactulose is safe, environment-friendly, and simpler in comparison to the chemical method. As a promising alternative to the chemical method, enzymatic conversion of lactose into lactulose by  $\beta$ -galactosidase or cellobiose 2-epimerase has recently gained a great deal of attention.

In-vitro studies on prebiotic efficacy provided evidence towards the effective fermentation of GOS by probiotic lactic acid bacteria, whereas GOS did not support the growth of pathogenic bacteria. GOS was also found to have a profound influence on the organic acids such as lactic, acetic and butyric acids production profile in comparison with ...
