Department of Mechanical Engineering and Mechanics Fundamentals of Computer Aided Design  
Geometrical Dimensioning & Tolerancing (GD&T) MEM 201

### **Geometrical Dimensioning & Tolerancing (GD&T)**

Geometric dimensioning and tolerancing (GD&T) is a system for defining and communicating engineering tolerances. It uses a symbolic language on engineering drawings and computer-generated three-dimensional solid models that explicitly describe nominal geometry and its allowable variation. It tells the manufacturing staff and machines what degree of accuracy and precision is needed on each ...

### **Geometric dimensioning and tolerancing - Wikipedia**

ISO 10579:2010 gives rules for dimensioning and tolerancing non-rigid parts where restraining of features is required during verification of dimensions and tolerances specified on a drawing.

### **Geometrical product specifications (GPS) -- Dimensioning**

Known as the "Doctor of Dimensioning," Alex Krulikowski is a noted educator, author, consultant, and expert on geometric dimensioning and tolerancing (GD&T).

### **Alex Krulikowski, Founder and President of Effective**

international meetings and have participated in all ISO standards projects on the subject of dimensioning and tolerancing during this period.

### **Geometrical product specifications (GPS) – Dimensional**

Gives instructions for correct execution and harmonizes the dimensioning of the symbols with the lettering. Refers to ISO 1101, ISO 3098/1, and ISO 5459.

### **Technical drawings -- Symbols for geometrical tolerancing**

An engineering drawing, a type of technical drawing, is used to fully and clearly define requirements for engineered items. Engineering drawing (the activity) produces engineering drawings (the documents). More than merely the drawing of pictures, it is also a language—a graphical language that communicates ideas and information from one mind to another.
