The WG conference traditionally aims at uniting theory and practice by demonstrating how graph-theoretic concepts can be applied to various areas in computer science, or by extracting new problems from applications. The goal is to present recent research results and to identify and explore directions of future research.

Graph Theoretic Formulation The problem can be formulated in graph theoretic terms in a natural way. Let  $G = (V, E)$  be an undirected graph representing a pipe network. Edges of the graph represent pipes. Let  $l_e \in \mathbb{Z}^+$  denote the length of pipe  $e \in E$ . Vertices of the graph represent connection points between the pipes.
