Course details. This degree has three stages, each comprising 120 credits. In Stage 1 you'll be introduced to the basics of mathematics and statistics.; Next, in Stage 2, you'll study modules covering economics, statistical analysis and mathematical methods.; Finally, in Stage 3, you'll further advance your knowledge of statistics and economics and conclude your degree with a mathematics ...

### **BSc (Honours) Economics and Mathematical Sciences**

Mathematical statistics is the application of mathematics to statistics. Mathematical techniques used for this include mathematical analysis, linear algebra, stochastic analysis, differential equations, and measure-theoretic probability theory.. Overview. In applying statistics to a problem, it is common practice to start with a population or process to be studied.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
