MC33035 - Brushless DC Motor Controller

Hi, I just finished a new controller for my electric scooter project. The current is limited to 50Amp but it can sustain at least 80Amp. It is also based on Mc33035 IC and it is capable to decode signal from the hall sensors.

Brushless motor controller Schematic

you are a man after my own heart my brother. i am an electronics tech myself with a love of the art. i was just looking for a controller for a ebike i'm building with an 800 w brushless dc motor that should take from 48 to 72 volts.

Updated Brushless controller schematic 2015
