The Kaplanâ€Meier estimator, also known as the product limit estimator, is a non-parametric statistic used to estimate the survival function from lifetime data. In medical research, it is often used to measure the fraction of patients living for a certain amount of time after treatment. In other fields, Kaplanâ€Meier estimators may be used to measure the length of time people remain ...

### **Kaplanâ€Meier estimator - Wikipedia**

Building construction is the process of adding structure to real property or construction of buildings. The majority of building construction jobs are small renovations, such as addition of a room, or renovation of a bathroom.
