Our Solar System auspost.com.auscm Page 3 Facts for students Mars At 6,799 km Mars is about half the diameter of the Earth. Mars has a surface temperature range of -125 to -20°C. A day on Mars is about 40 minutes longer than an Earth day, and it takes 687 days to orbit the Sun.

Our Solar System - Facts for Students

The sun is the center of our solar system. It is the largest body in our solar system. Nine planets follow paths called orbits around the sun. The shape of each orbit is called an ellipse. An ellipse is a flattened circle (see the picture at the bottom of page 3). The nine planets are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune, and Pluto. Moons, asteroids, comets, and meteoroids are also part of our solar system. Moons orbit planets.

The Solar System Puzzle Kit was designed for the National Aeronautics and Space Administration by the: Office of Human Resources and Education Education Division and Office of Space Science Solar System Exploration Division Designer: Gregory L. Vogt, Ed.D. Teaching From Space Program NASA Johnson Space Center Houston, TX Writers: Gregory L. Vogt, Ed.D.

Solar System Puzzle Kit pdf - Great Balls of Fire!

where is our solar system Online Books Database Doc ID d72506 Online Books Database Where Is Our Solar System Summary of : where is our solar system introduction a solar system is a star and all of the objects that travel around it planets moons asteroids comets and meteoroids most stars host their own planets so there are likely tens of ...

Where Is Our Solar System [PDF, EPUB, EBOOK]

☄ Storms have fastest winds in Solar System at 670 m per second. ☄ Great Dark Spot observed by Voyager 2 in 1989, disappeared by 1994. ☄ Triton is Neptune's only large satellite and is bigger than Pluto. It is the coldest known object in the Solar System at -235°C (-391°F) Composition: Small core of rock and ice

THE SOLAR SYSTEM AND THE UNIVERSE - Armagh Planetarium

reflecting sunlight. Together, the Sun and all the objects that orbit it make up the Solar System. The Solar System is the Sun's system. The Earth is the third planet from the Sun. It has a smaller companion going around it, called the Moon. Most planets have at least one moon of their own, and the giant planets have dozens.

EXPLORING THE SOLAR SYSTEM - Ian Ridpath - Homepage

Introduction A solar system is a star and all of the objects that travel around it "planets, moons, asteroids, comets and meteoroids. Most stars host their own planets, so there are likely tens of billions of other solar systems in the Milky Way galaxy alone. Solar systems can also have more than one star.
