

pocket primary care pocket pdf

Primary care providers have an important role to play in suicide prevention. This toolkit can be used by all primary care providers. It contains tools, information, and resources to implement state-of-the-art suicide prevention practices and overcome barriers to treating suicidal patients in the primary care setting.

Suicide Prevention Toolkit for Primary Care Practices

In the United States, direct primary care (DPC) is a type of primary care billing and payment arrangement made between patients and providers, without sending claims to insurance providers. It is an umbrella term, incorporating various health care delivery systems that involve direct financial relationships between patients and health care providers.

Recognizing and Responding to Suicide Risk: Essential Skills in Primary Care (RRSR-PC) is a one-hour training program that provides Physicians, Nurses/Nurse Practitioners, and Physician Assistants with the knowledge they need in order to integrate suicide risk assessments into routine office visits, to formulate relative risk, and to work collaboratively with patients to create treatment plans.

Recognizing & Responding to Suicide Risk: Essential Skills

What is Long-Term Care? Individuals need long-term care when a chronic condition, trauma, or illness limits their ability to carry out basic self-care tasks, called activities of daily living (ADLs), (such as bathing, dressing or eating), or instrumental activities of daily living (IADLs) (such as household chores, meal preparation, or managing money).
