The pregnancy verification form is a letter that is used to show proof of a positive pregnancy test, confirming that the woman is indeed pregnant. The form details the date when the individual visited the clinic/hospital, the estimated date of delivery, and any additional notes or comments related to the test.

### **FAQ119 -- Exercise During Pregnancy**

Maternal physiological changes in pregnancy are the adaptations during pregnancy that a woman's body undergoes to accommodate the growing embryo or fetus. These physiologic changes are entirely normal, and include behavioral (brain), cardiovascular (heart and blood vessel), hematologic (blood), metabolic, renal (kidney), posture, and respiratory (breathing) changes.

Teenage pregnancy, also known as adolescent pregnancy, is pregnancy in a female under the age of 20. Pregnancy can occur with sexual intercourse after the start of ovulation, which can be before the first menstrual period (menarche) but usually occurs after the onset of periods. In well-nourished females, the first period usually takes place around the age of 12 or 13.

Human chorionic gonadotropin (hCG) is a hormone produced by the placenta of a pregnant woman. Early in pregnancy, the level of hCG increases in the blood and is eliminated in the urine. A pregnancy test detects hCG in the blood or urine and confirms or rules out pregnancy. During the early weeks of pregnancy, hCG is important in maintaining function of the corpus luteum.
