Solar energy is radiant light and heat from the Sun that is harnessed using a range of ever-evolving technologies such as solar heating, photovoltaics, solar thermal energy, solar architecture, molten salt power plants and artificial photosynthesis.. It is an important source of renewable energy and its technologies are broadly characterized as either passive solar or active solar depending on ...

The largest group of geothermal power plants in the world is located at The Geysers, a geothermal field in California, United States. As of 2004, five countries (El Salvador, Kenya, the Philippines, Iceland, and Costa Rica) generate more than 15% of their electricity from geothermal sources. Geothermal electricity is generated in the 24 countries listed in the table below.

Abstract: Today in the conventional power steering systems, it is observed that there are many drawbacks, such as it reduces the engine power in case of hydraulic power steering system, reduces mileage which leads to increased demand of fuels. This increases the operating cost. There is a need to develop such a system which enhances the engine performance and gives better result as of the ...
