Methodology, theory, paradigm, algorithm, and method. The methodology is the general research strategy that outlines the way in which research is to be undertaken and, among other things, identifies the methods to be used in it. These methods, described in the methodology, define the means or modes of data collection or, sometimes, how a specific result is to be calculated.

In contrast to the social sciences, the interest in and use of narrative research within nursing is relatively new. Narrative inquiry was first used by Connelly and Clandinin as a methodology to describe the personal stories of teachers. Narrative researchers look for ways to understand and then present real-life experiences through the stories of the research participants , .
