Graphics: Drawing Images and Geometric Shapes

Recognize geometric shapes and structures (e.g., in the environment). Concept Skill: Shapes A geometric shape can be either a two-dimensional or a three-dimensional figure A two-dimensional shape has two dimensions, length and width. Two-dimensional figures also have sides and angles. A side is a straight line and an angle is where sides connect.

2. Two Dimensional Shapes Two dimensional shapes are also called plane shapes. One dimension is a line; only one coordinate is required to describe the position of a point (x, y) . Whereas, with a two dimensional shape, which is a shape with two dimensions "length and width", two coordinates are required to describe the position of point (x, y) .
