In meteorology, a cloud is an aerosol consisting of a visible mass of minute liquid droplets, frozen crystals, or other particles suspended in the atmosphere of a planetary body. Water or various other chemicals may compose the droplets and crystals. On Earth, clouds are formed as a result of saturation of the air when it is cooled to its dew point, or when it gains sufficient moisture ...

A couple of friends and I are making this pattern as a gift for a fellow quilter, but in a much lively palette. I eyed the pattern and the cutting directions for a few minutes and decided it would be ever so much easier to strip piece the alternating narrow horizontal strips rather than stringing together skinny pieces since those rows are all the same.
