Personal genomics or consumer genetics is the branch of genomics concerned with the sequencing, analysis and interpretation of the genome of an individual. The genotyping stage employs different techniques, including single-nucleotide polymorphism (SNP) analysis chips (typically 0.02% of the genome), or partial or full genome sequencing. Once the genotypes are known, the individual's variations ...

Understanding the promise of personalized learning. by Alex Hernandez. Personalized learning theory is built on the twin pillars of 1) differentiated learning pathways for students and 2) feedback that enables students to make informed judgments about what theyâ€™ve learned, how well theyâ€™ve learned it, and what to learn next.

Should Personalization Be the Future of Learning
