human body. You can also begin to see the interconnections between the different parts of the body in order to understand how the body functions. We should warn you that there are two serious misconceptions that

you may get from this book. One misconception is that any part of the human body exists in a static state. Actually everything

Everything you smell, from fresh baked bread to a stinky trash can, puts molecules into the air. When we smell, the inside of the nose, the nasal cavity, detects these chemical molecules. The nasal cavity is lined with a wet, sticky liquid (mucus) and tiny hair cells (cilia, which youâ€™ll also find in the ear).
