To survive in the forest one must consider multiple aspects, these aspects consist of: Food, Shelter, Defences and supplies. Survival in the forest is harder than in other games because of its realistic health and stamina system as well as the extreme amount of damage one must inflict to successfully kill any type of hostile mutant.

management of forest conservation areas, enhancing connectivity between forest areas). Many of these management actions also contribute to climate change mitigation through reducing emissions from forests, conserving forest carbon or enhancing forest carbon sinks. Forest carbon management offers potential for some immediate financial benefits.

Forest floor contains decomposing leaves, animal droppings, and dead trees. Decay on the forest floor forms new soil and provides nutrients to the plants. The forest floor supports ferns, grasses, mushroom and tree seedlings. Understory is made up of bushes, shrubs, and young trees that are adapted to living in the shades of the canopy.
