

the protein kinase factsbook pdf

Ca²⁺/calmodulin-dependent protein kinase II is a multisubstrate protein kinase that is activated by increases in intracellular Ca²⁺ ion concentration. The kinase phosphorylates a wide variety of intracellular proteins including metabolic enzymes, transmitter synthesizing enzymes, ion channels, membrane receptor proteins, and transcription factors.

The Protein Kinase FactsBook: Protein - Tyrosine Kinases contains over 65 entries on members of the family from vertebrates, Drosophila, slime moulds and other organisms.

The protein kinase factsbook (eBook, 1995) [WorldCat.org]

The protein kinase activity is essential for signal transduction, although whether this involves autophosphorylation only, or whether there are downstream substrates for the kinase domains is not yet known.

New PDF release: The Protein Kinase Facts: Book. Protein

The chapter discusses the structure of protein kinase catalytic domains, and the classification of protein kinases according to the sequences of those domains.

Taken together they compile everything you wanted to know about proteins but were too busy to look for. The Protein Kinase FactsBook: Protein - Tyrosine Kinases contains over 65 entries on members of the family from vertebrates, Drosophila, slime moulds and other organisms.

The Protein Kinase Factsbook, Two-Volume Set - 1st Edition

kinase was the first protein kinase to be characterized biochemically and the mechanism of its regulation led to the discovery of cAMP-dependent protein kinase (protein kinase A, or PKA), which catalyzes the phosphorylation and activation of phosphorylase kinase. This was the first protein kinase cascade or signaling module to be elucidated.
