This article introduces a novel concept, Belief in a Zero-Sum Game (BZSG), proposed as another belief dimension in the family of social axioms. We conceptualize BZSG as a belief system about the antagonistic nature of social relations—that one person's gain is possible only at the expense of other persons. It appears on a level of personal convictions and as a cultural worldview ideology.

For him, the fundamental problem is that the economy is a "zero-sum" game in which for every winner there must be a loser. To deal with these interrelated problems would thus require a consensus on what an equitable distribution of economic goods would be; and such a consensus does not exist in a society composed of special-interest groups.
